Year-To-Date All Baled Hay Exports from West Coast Ports Up 1.6% from the same Period a Year Ago– All baled

hay exports from California ports were up 6.1% for the first five months of the year compared to the same period last year. While alfalfa hay exports to China were off 70,276 metric tons (MT) from LA/Long Beach ports, higher exports to other countries more than offset the fewer exports to China from L.A/Long Beach. Alfalfa hay exports to Saudi Arabia from LA/Long Beach were up 10% while exports of alfalfa and grass hays to South Korea were up 17%. Exports of alfalfa hay to the UAE from LA/Long Beach have been especially strong in 2019, up 51,449 MT, or 170% over the first five months of 2018. During the first five months of this year all hay exports from Seattle/Tacoma ports were down 3.1% from a year ago. The PNW has been hit harder by the slow-down in alfalfa hay exports to China with volume down 102,696 MT or 56% lower than the first five months of last year. Exports of alfalfa and grass hays to South Korea from Seattle/Tacoma were down 11.8%. Exports of all hay from Seattle/Tacoma to Japan were up 13% while exports of alfalfa hay to the UAE were 179% higher than January through May of last year.

Ocean Shipping Fuel Cost - Reuters is reporting that beginning in January 2020 the U.N. International Marine Organization will ban ships from using fuel oil with a sulfur content higher than .5%, compared to 3.5% allowed today. Container ships are expected to shift from fuel oil to the more expensive gasoil, a low sulfur distillate fuel. Ships that don't change to the new fuel will be required to install costly emissions systems that removes sulfur from the exhaust. Reuters Research estimates fuel cost for shippers would be 25% higher using gasoil versus fuel oil at current prices. This could also have an impact on diesel prices as refiners compete for low sulfur crude oil that is easier to refine.

Dairy Product Prices - The California Federal Milk Market Order uniform June price for Tulare was announced yesterday at \$16.35 cwt, up 30 cents from May. August Class III milk futures lost some ground late in the week, dropping 34 cents to \$17.55. According to the Dairy & Food Market Analyst, concerns over increasing supplies of dairy products in Europe outweighed potential decreases in U.S. milk production. Block cheese was down six and a quarter cents this week to \$1.7850 per pound while Barrels were down four cents to \$1.7400. Nonfat dry milk prices on the CME were down one and a half cent to \$1.0275. Butter closed the week at \$2.4125, up three quarters of a cent from a week ago. Dry whey was down half a cent on Friday to \$0.3225.

Milk Cost of Production – FRAZER, LLP released milk cost of production data for dairies in the west for all of 2018 and last week we reported milk cost of production for the San Joaquin Valley and Southern California. **Correction for Southern California in last week's report**, should have read \$17.81 cwt in 2018, \$17.80 in 2017, and \$16.62 in 2016. The 2018 milk cost of production for other areas in the west are as follows with prior year comparison's: Kern County \$16.92 cwt. in 2018 and \$16.21 in 2017; Arizona \$19.64 and \$18.36; Idaho \$17.48 and \$16.76; New Mexico \$19.66 and 18.44; Texas Panhandle \$17.14 cwt. in 2018 and \$16.69 in 2017; and Pacific Northwest \$17.46 and 17.94.
